# Introduction

## What is Visualite?

...Simply revolutionary. Powered by spectacular edge light technology and supplied with a vast array of stunning visuals, our new range of Visualite systems create an amazing lighting effect and ambience, incorporating the light source and bespoke image into one.

As well as choosing from any of our beautiful high definition images we can also incorporate your own images and artwork to provide the personalised product which you desire. Feel the warm embrace of daylight shining down from the ceiling with the magnificent blue-sky scene, or gaze across iconic landscapes no matter where you are. Years of continuous development now enable us to be ahead of the game, providing exciting simulations fit for any scenario.

The Visualite system can provide a pleasant and powerful impact in any of these environments:

- Education
- Hospitals and other medical environments
- Retail and leisure
- Car showrooms
- Commercial offices
- Sport stadiums
- Basements
- Boardrooms
- Homes

The list is endless, the only limit is your imagination.

## What makes Visualite unique?

- Unlike anything on the market, the quality of printing on our products is exceptional. Using the VTEC system, we process in the full colour spectrum, rendering a superb image, with no compromise on the quality
- Non-ferrous Visualite systems available for medical environments
- Built with a tough outer protective coating, the Visualite system offers a fully wipeable surface for ease of maintenance and product longevity
- Personalised service: Our dedicated design team will assist you in selecting your image

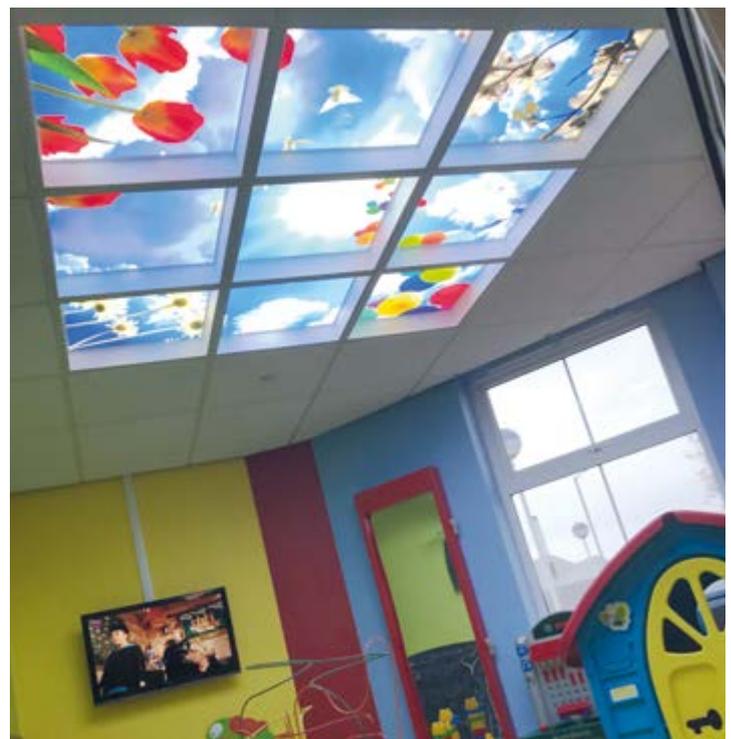

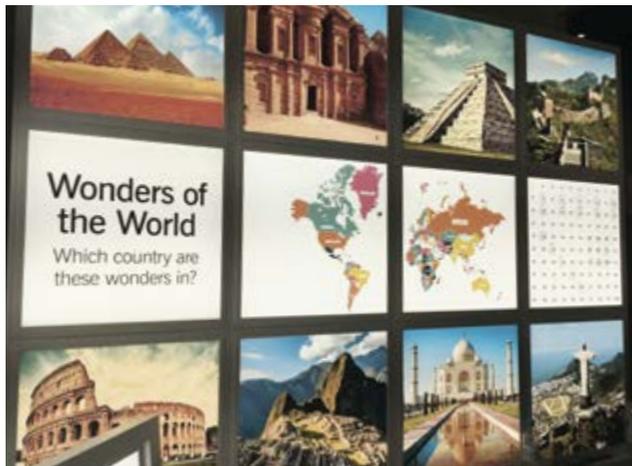

# Educational benefits

Classrooms are nurturing environments that can occasionally appear bare and sterile, with young people frequently feeling anxious and distressed regarding their circumstances. Visualite panels can help by improving their surroundings, creating night skies, or a feeling of open space, such as green hills or rolling oceans. Images are enhanced with more depth, by combining them with soft soothing lighting.

Visualite panels can enhance the nurture environment and reduce anxiety creating calming environments in challenging scenarios. Rooms are transformed into far more user friendly and engaging settings. A catalyst for stimulating a child's imagination within the classroom, from ceiling lighting arrays displaying the universe to a practical wipeable, illuminated screen which the children can write on. Acting as a tool to maintain engagement in class and maximising the educational process.

Outside the classroom, in entrance foyers or visitor spaces Visualite panels can be used to "light up" the school emblem, or highlight the school motto and mission statement, creating a lasting first impression to all that enter.

# Customer Feedback

Cowdenbeath Primary School are delighted with our Visualite panels as they have transformed our Quiet Room. Our intention was to introduce a room in school for children who require support for the health and wellbeing. The existing room had an old couch and unwanted furniture. We wanted a small, inviting and comforting room that would help children to relax and support them to be able to access their learning. We chose the theme of 'Under the Sea' and Adam was able to give us different options of pictures and designs. We had seen examples of Visualite in other schools but what impressed us was that Adam and his team were able to tailor their work to our room size, need etc. On the day of the fit the staff were very professional and the work was completed to a high standard. The children, and staff, are absolutely delighted with the results. The room is used frequently now by children who need a short time out of class to calm down and then return to their learning. We are now considering ways that we can use Visualite to enhance other areas of the school. Thanks again to Adam and the team.

Karyn A Rennie, Headteacher  
Cowdenbeath Primary School

We are extremely pleased with both installations and feel that they brighten up 2 areas which were rather dull. The service that we received from Visualite and YESSS Electrical was great and installation was painless!

The display with the values has brightened up the corridor and is helping us reinforce our values far better than anything else that we have used before. As it is near the entrance numerous parents have mentioned how attractive it looks and it will not fade with the sunlight!

The display in the "chill out" room is allowing pupils to take time out. This has worked for individuals as well as a whole class of Primary 7 children who loved getting their mats out, lying down and just watching the scene on the ceiling. Children are more receptive and ready to discuss their feelings once they have spent some time staring at the image on the ceiling.

Newport Primary School

Lynburn Primary School have had Visualite panels installed in their Sensory Room. This is a small room with no windows and we were keen to create more light. The room has an underwater theme which the children had ownership in choosing. This is a great safe space for our children with additional support needs, particularly those with ASD to access after key transition points throughout the day. They find it a relaxing, calming environment which can quickly settle any anxious or upsetting behaviours before returning to class. We are really pleased with the room now.

Louise McIlhatton, Headteacher  
Lynburn Primary School

TWFRS specified Visualite LED printed lighting panels at Safety works! Our acclaimed interactive community educational facility.

'Blue-sky' thinking was the theme used, the installation of Visualite panels supported and enhanced this theme.

The facility is jointly used by TWFRS, Northumbria Police, St John Ambulance, NEXUS and the RNLI, feedback from partners and user groups has been 100% positive and we wouldn't hesitate in recommending Visualite again.

Andrew Warren BSc (Hons),  
Head of Estates and Facilities  
Tyne & Wear Fire & Rescue Service

## Circular Panels

Add a fun element to any interior, with Visualite's new range of circular lighting panels. From cartoon faces to striking detailed images of planets, these compact lights come in various sizes and can be customised to your heart's content with quirky imagery to suit.

Sizes (diameter) and wattages available:

172mm - 12W

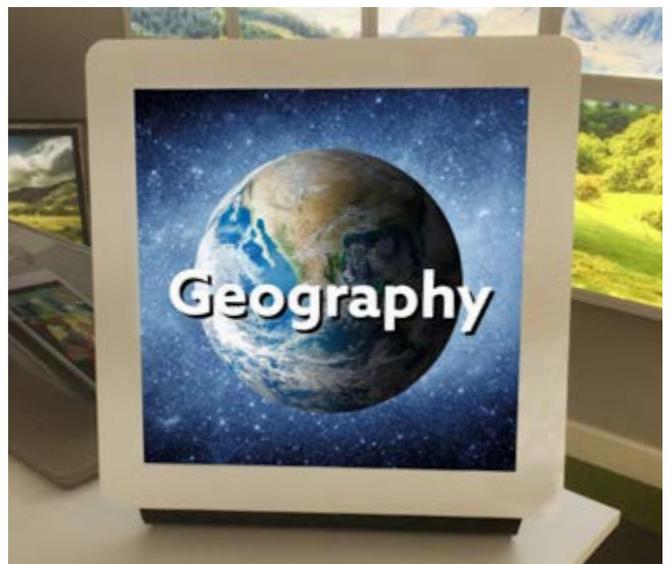

225mm - 18W

300mm - 24W

## Desktop Displays

Wall mounted or desktop interchangeable displays. Ideal for receptions, classrooms, information points and more. The displays can also feature any image and also be dry wipeable.

# Animated Distraction Panels with Visualife<sup>AR</sup>

## What is Visualife?

Visualife is the link between the physical and digital world that allows people to process both simultaneously.

It is a professional augmented reality (AR) platform that uses patented image recognition software to deliver interactive content to consumers' devices. The software will simply recognise the trigger image and stream content directly to your consumers smart phone or tablet. Everything from viewing and interacting with augmented content happens in real-time on your consumers device.

## How to use the App

- 1  Download the FREE App  
Search for Visualife AR on the Apple App Store or Google Play.
- 2  Create a login  
Signing in will allow your scanned history to be stored for you to revisit.
- 3  Start scanning Visualife enabled images  
Scan within the crosshairs when you see the Visualife icon and watch the images come alive.

## Government funding available to replace your old lighting!

### Do you want to:

- Upgrade your lighting to the latest low energy efficient models?
- Achieve energy savings of up to 60%?
- Save time and money on maintenance - up to 50%?
- Get improved light levels?

Government funding is now available through the **SALIX** scheme. For maintained schools this is available all year round and for academies in rounds once a year.

- 100% interest free loan
- Minimum loan amount £500 - no maximum
- Loan is repaid twice a year
- Loan repayment terms between 5 - 8 years depending on the project
- Value of loan is based on predicted annual savings

### Example:

If the project costs £5,000 and the predicted energy savings are £1,000 per year, then the loan would be repaid over 5 years from the predicted energy savings.

## Technical Specifications

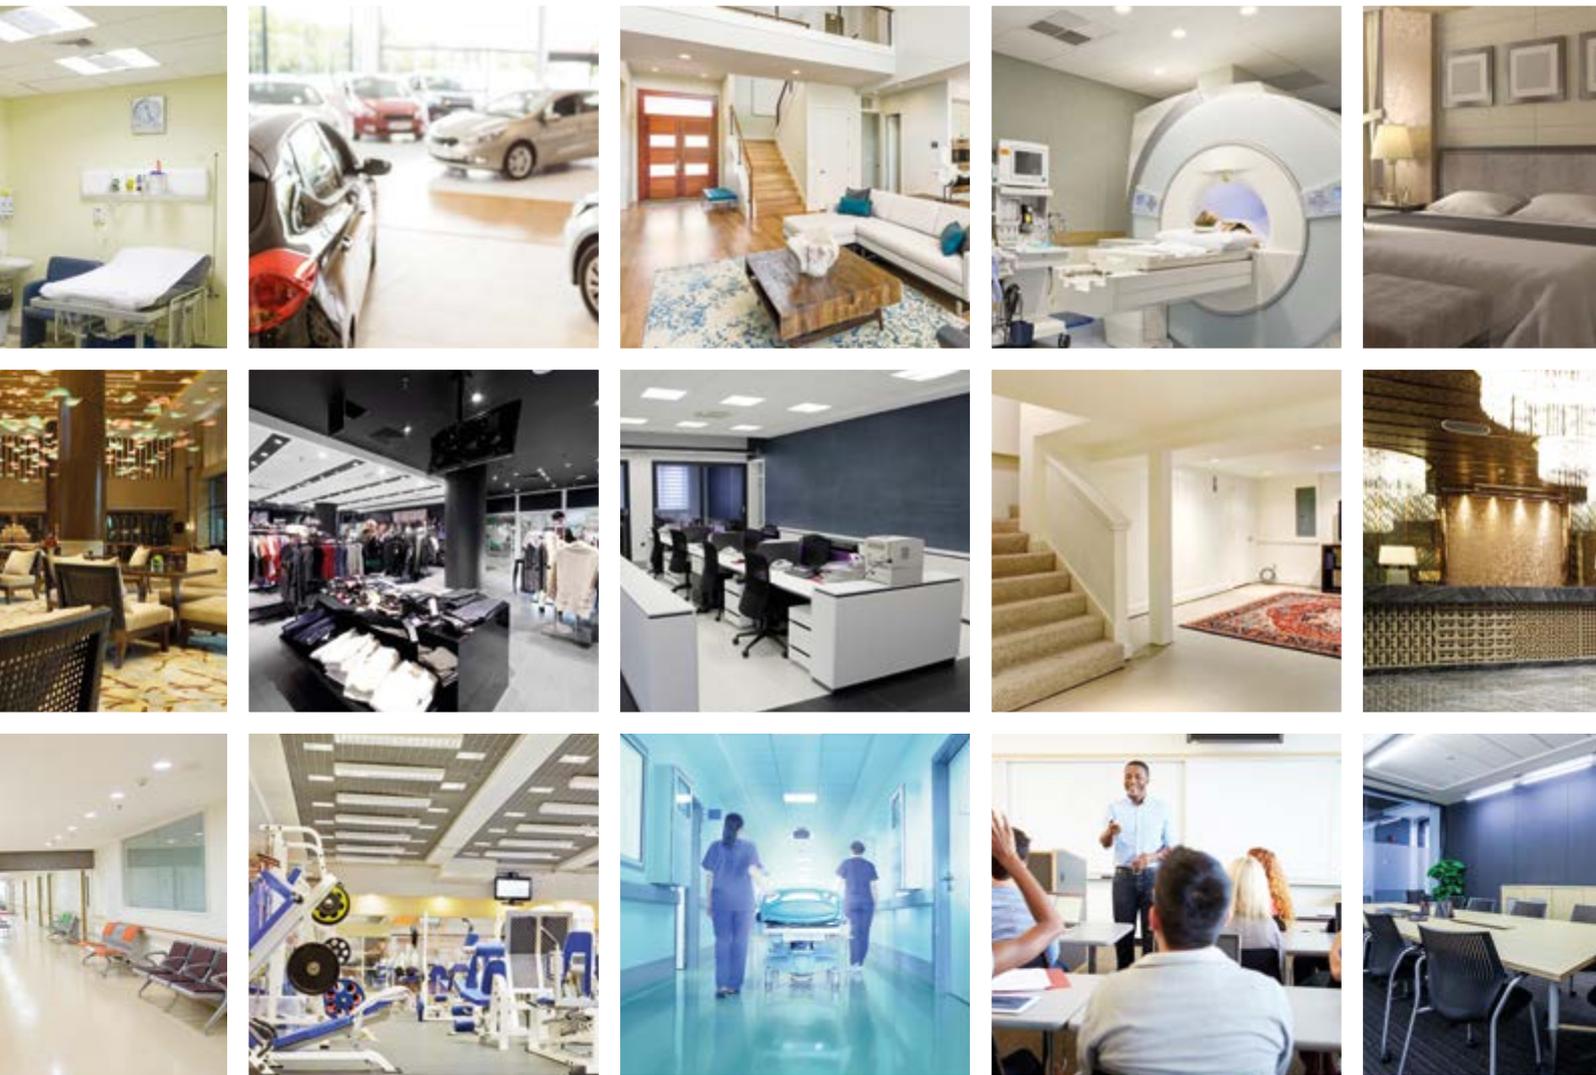

### The Visualite System

- Suitable for 25mm and 15mm T-bar ceiling installations
- Suitable for wall mounted installations using our bespoke modular frame system
- LED lighting technology
- Operating lifetime (hours): 50,000
- Excellent colour rendering index for colour resolution and stability (RA)>80
- 6000k colour temperature
- Flexible light output capability using our dimmable driver solutions

### Modular cell dimensions

(Bespoke sizes also available on request)

600 x 300mm	1200 x 300mm		
600 x 600mm	1200 x 600mm	1200 x 900mm	1800 x 1200mm
